

Source Change Sparkle Player on ONN Google Stick

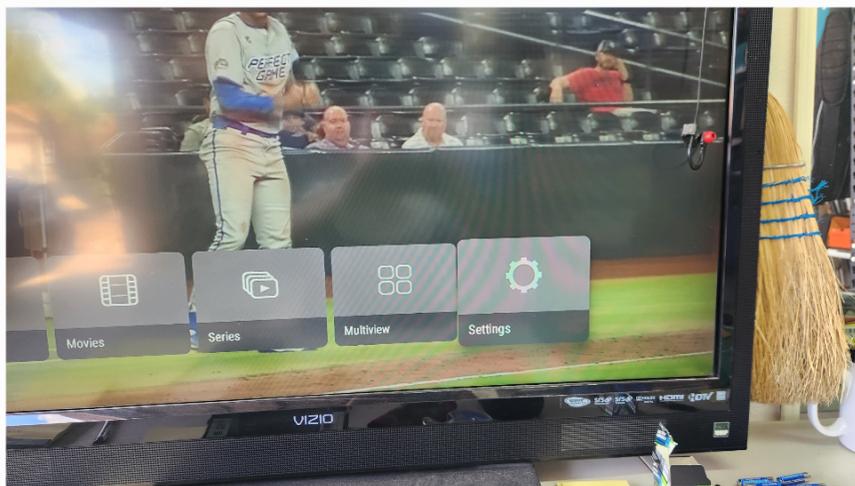

1. Start in full screen live TV in **any source**.
Even if live TV is showing error!!!

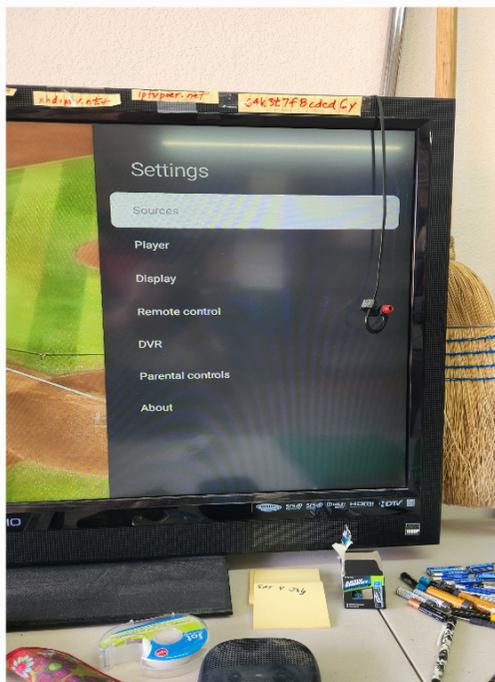

2. Select OK button [large white] and then
down X2

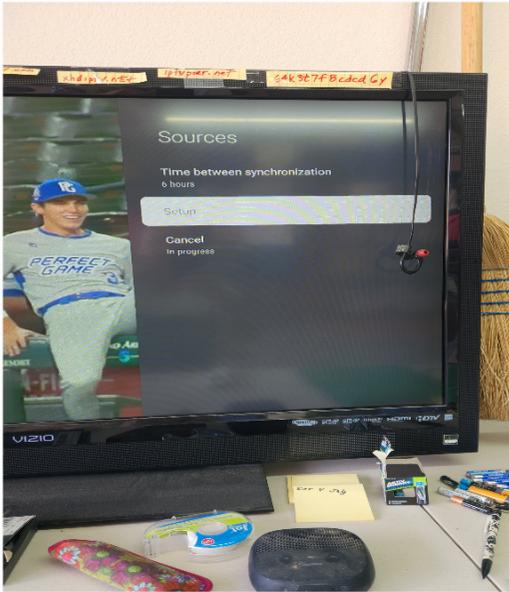

3. Then right button X4 to settings

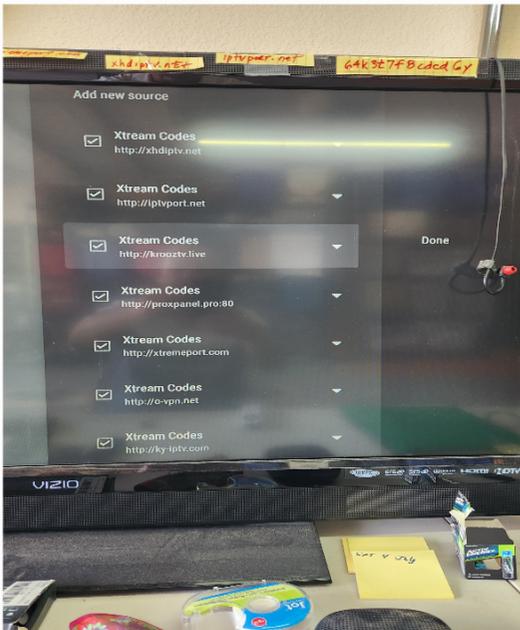

4. Then select [white button] on sources

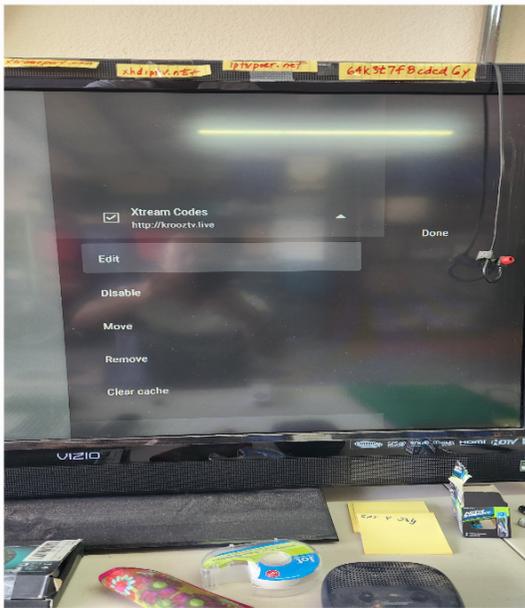

5. Then select Setup [white button]

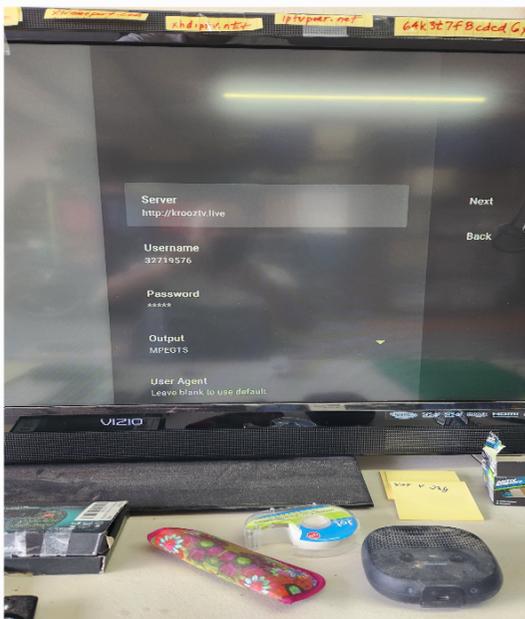

6. Then select http address to edit...in this example the address is <http://krooztv.live>.

7. Select edit [white button]

8. Then left button (from next) to server address and select (white button)

9. Use keyboard to enter new address:

TV Dan will instruct you on what NEW tv source to enter. For sources beginning with: **krooz, prox, myxpanel** the new source server address is:

krooztv.cloud:8080

proxpanel.live:8080

proxpanel.app:8080

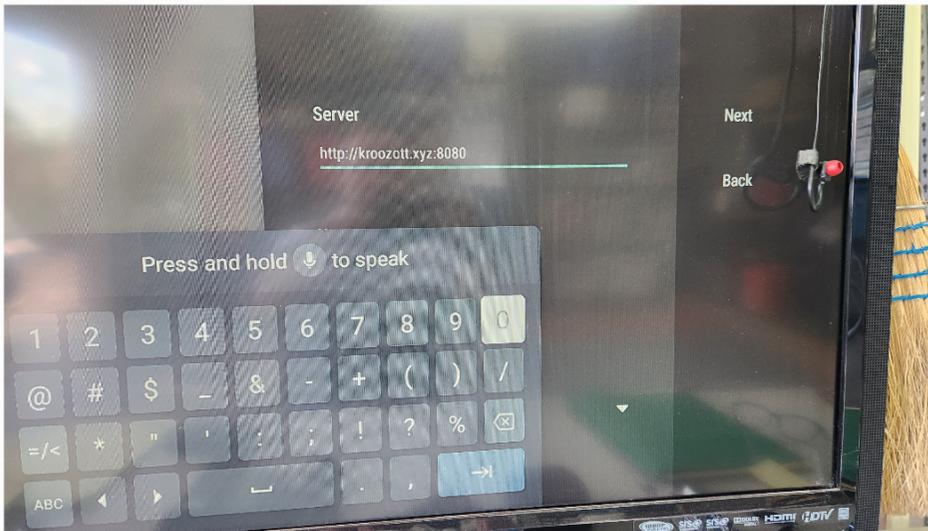

proxpanel.cc:8080

For server sources beginning with **xhd, iptvport, xtremepoint, ky-iptv**, the new source server address is:

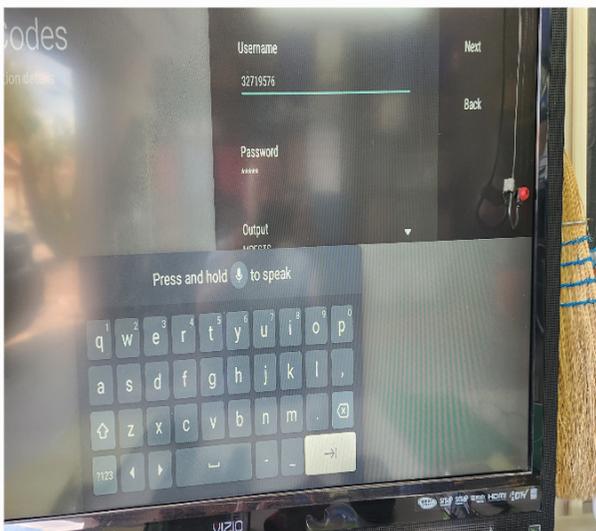

ky-tv.cc

kytv.xyz

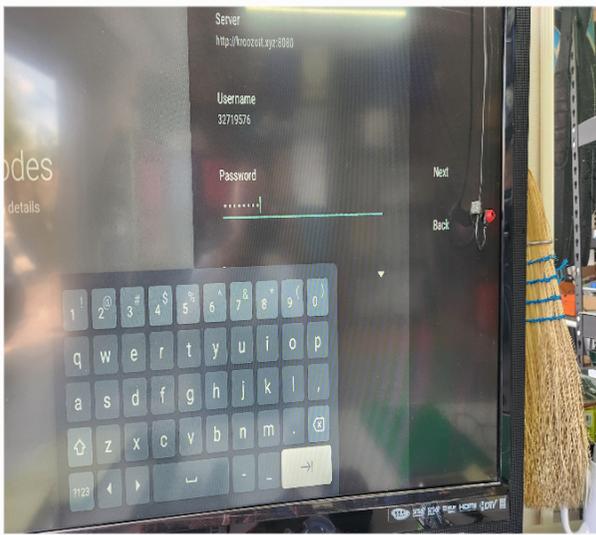

*******http://***** is not necessary to enter with new server addresses**

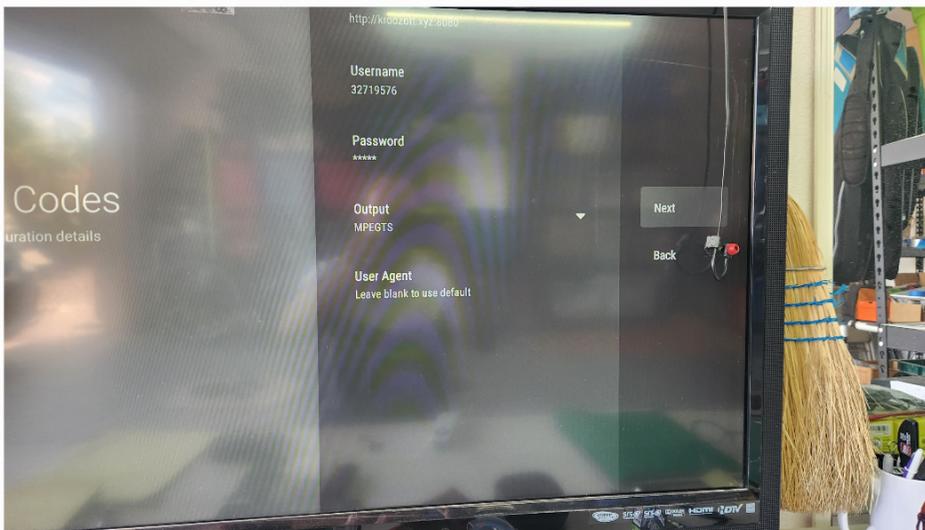

11. The username remains same so use keyboard per below to advance to password

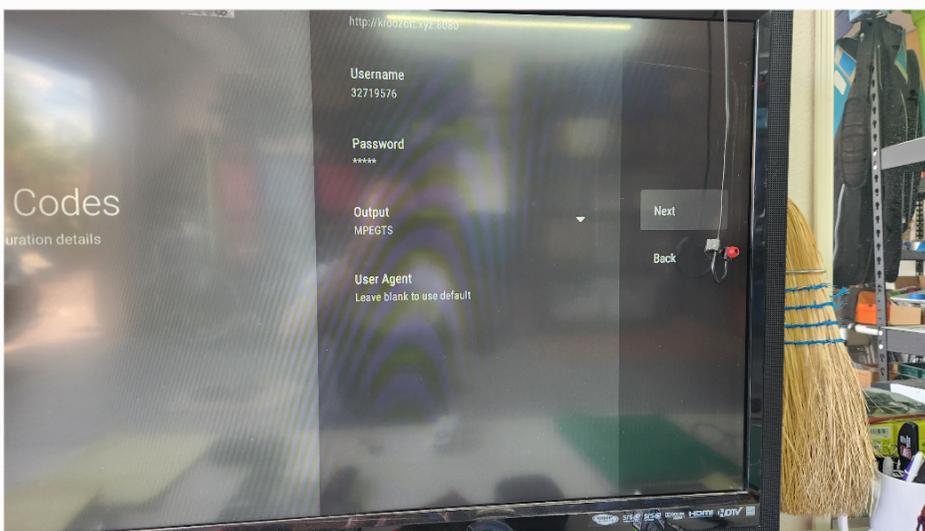

12. The password remains the same so use keyboard to advance to Output

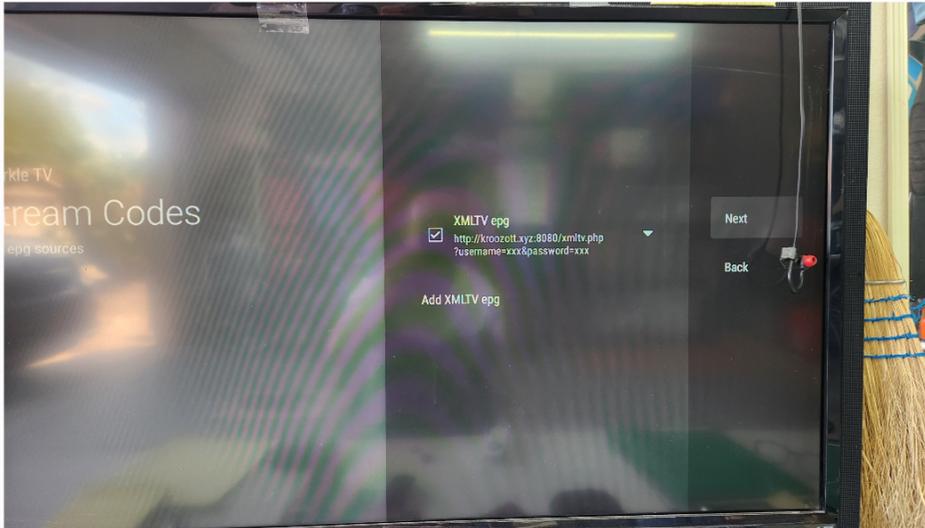

13. Then right button to next

14. Select Next

15. Select Next

16. Right button to update

17. Then right button to Done and select (with white button)

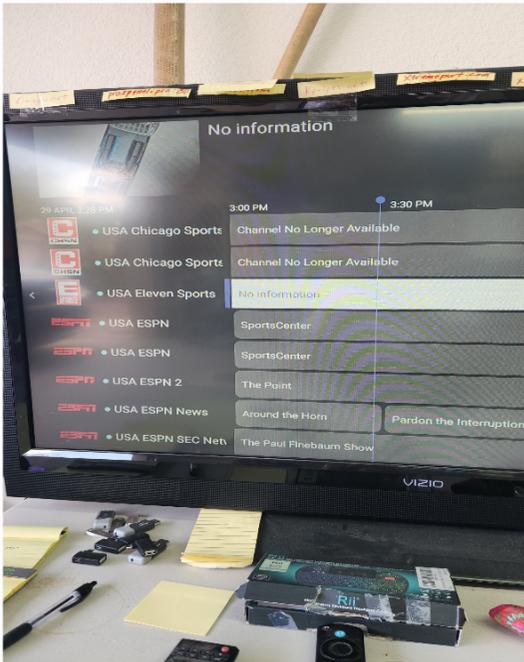

18. Sources will then update

19. Select Close

20. Back arrow button X2 to live programming.

21. Go Guide

22. Left button 2X to view Source column.

23. New source is now part of source column.
